

Article task – “Silicon: A Versatile Material”

Read the article through – it is 3 pages long. I am not expecting you to understand everything but to expose you to scientific writing and literature which is important for university. You should be able to make sense of most of the article.

Task 1:

Find **10 words** you don't recognise or understand and find out their definitions. Try to rewrite these in your own words rather than copying them directly from the internet.

Word	Definition

Task 2:

Tell me 3 points you took away from the article – can be something you found interesting, surprising or something you discovered for the first time!

- 1)
- 2)
- 3)

Final question

On a scale of 1-5 (1 = impossible to understand to 5 = understood it all), how difficult was it to understand this article?
